

CONTRACT TOOL ACCOUNTS

One Company, One Call,
Countless Solutions.

The Need ▶

Whether the industrial construction market is weak or strong, many contractors are frustrated at their inability to effectively manage and control their assets in a simple, predictable way.

As they try to control small tools, consumables and safety supplies at the jobsite, they are facing a number of challenges:

- ▶ Initial cash outlay/negative cash flow
- ▶ Tool loss, theft, and abuse
- ▶ Multiple invoices from suppliers
- ▶ Inventory utilization
- ▶ Asset disposition at project end
- ▶ Tools and supplies issue/return

These challenges add up, resulting in significant losses to craft productivity, delays in project schedules and total installation costs that skyrocket out of control.

The Solution ▶

What the industry needed was a solution that would keep simplicity and value front and center, giving contractors access to the tools and supplies they needed, within set timeframes and controlled costs.

AMECO developed a solution with our Contract Tool Accounts (CTA), providing our clients with a cost-effective way to rent and manage small tools, consumables and supplies on capital construction projects. Our CTA is highly flexible, serving multiple industry sectors, including energy and chemicals, power, mining and metals, manufacturing and government.

▶ Solution Benefits:

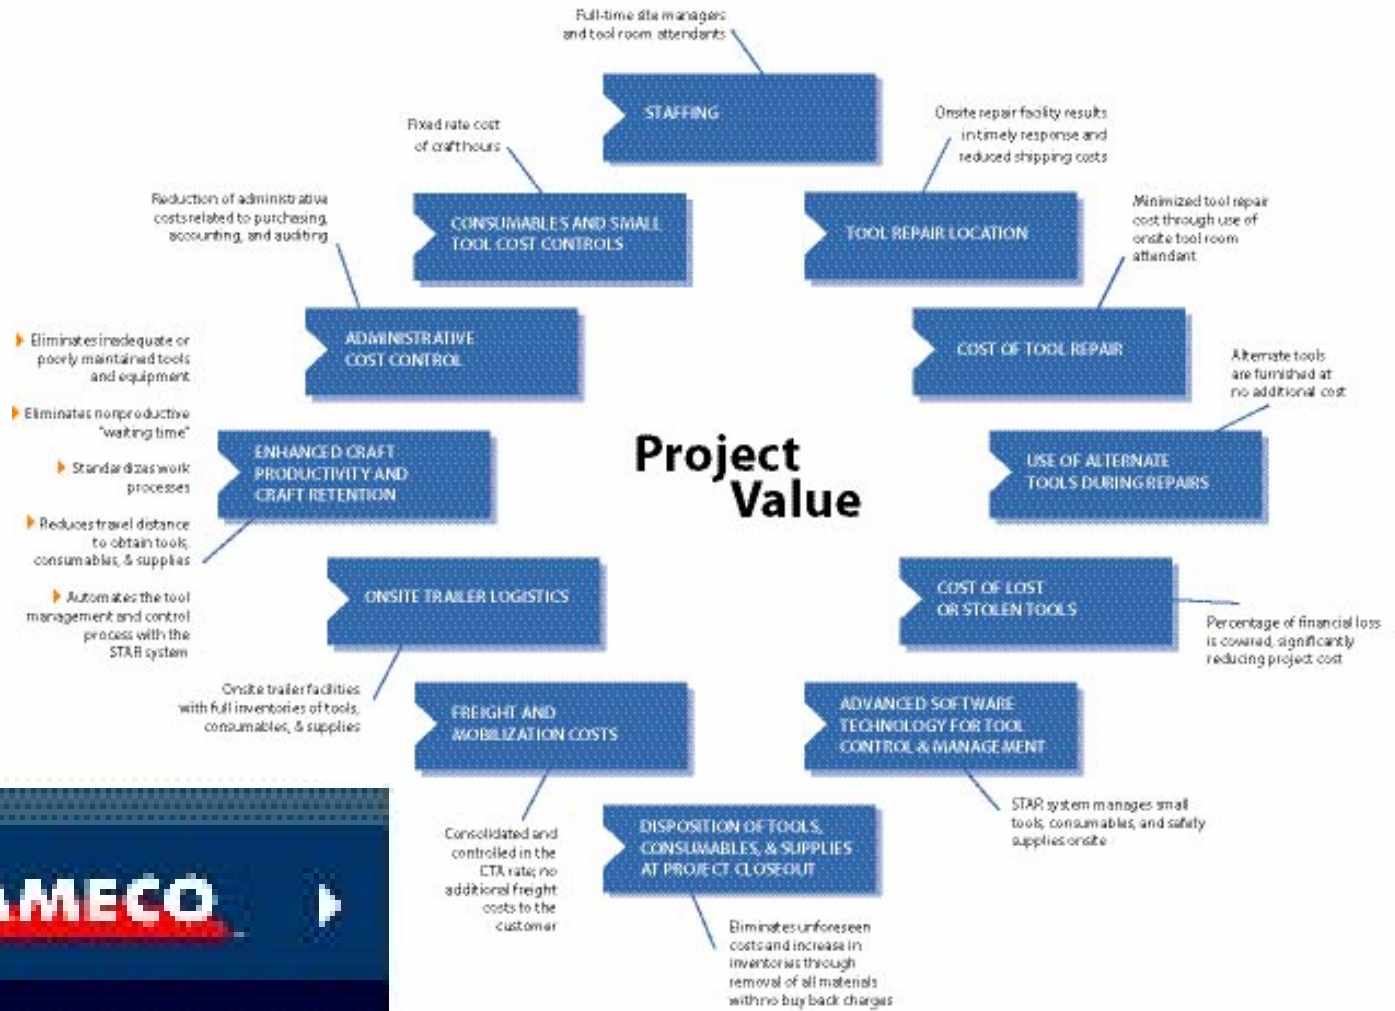

- Enhanced cash flow
- One monthly invoice
- Inventory optimization
- Onsite inventory locations
- Electronic barcode tracking
- OSHA/Ansi compliance

▶ Delivering Integrated *Mobile Equipment* and *Tool Solutions* to Industry *Worldwide*.

Contract Tool Accounts ▶
